

OVERVIEW OF PHYSICAL EVIDENCE FOR CREATION

OUTLINE – SESSION 18

1. Description of Evolution and Creation
2. Common reinterpretations of Genesis
3. All Biblical statements about science are true: Ex; Job 26: 7, Ecc 1: 6
4. Formation of the Universe
 - A. Biblical explanation
 - B. Big Bang theory
5. Problems with Big Bang
 - A. Ex: Never seen one star form, Conservation of angular momentum
 - B. Many scientists and major publications disagree
6. Planets are all different – Why? (Ecc8: 17 – God says why)
7. Laws of Science indicate master design for Universe
 - A. Stars never collide – Planets obey Kepler’s 3 Laws
 - B. 2nd Law of Thermodynamics - Laws of Physics
8. Real Age of Earth – More than 100 scientific proofs of Young Age
 - A. Shrinking size of Sun – Decay of Earth Mag Field
 - B. Concentration of chemicals in Ocean – Continental Erosion
9. So why Earth Age of 4.5B yrs? -- Based on decay of radioactive elements
10. Petrification doesn’t require B+ yrs – Neither does Coral Growth
11. What does Geology tell us?
 - A. “E” says rock layers deposited over B+ yrs
 - B. “C” says layers deposited in 1 yr during Genesis Flood
12. What evidence shows catastrophic effect of Worldwide Flood?
 - A. Mt St Helens shows Rapid Layering – 600 ft in 9 hrs
 - B. Canyons cut quickly in solid rock – 150 ft in 6 hrs
13. “E” says Fossils formed over years – total nonsense !!
 - A. 1 Mill Bison never fossilized – Need Rapid burial
 - B. 6 ft fish fossilized giving birth requires rapid burial
14. Evidence of recent Global Flood?
 - A. Bristlecone Pine in CA and Niagara Falls in NY
 - B. Hudson river Submarine Canyon – Why?
15. Genesis Flood started breakup of single land mass
 - A. Initiated by Volcanic activity — Followed by ocean plate subduction
 - B. Ocean Ridges resulted from outwelling of magma
 - (1) Forced separation of continents very rapidly
 - (2) Magma heated oceans, added most of rainwater for Flood
